

PRODUCTS AND SERVICES

PLUG'N DRIVE CAN HELP YOUR ORGANIZATION SHOW LEADERSHIP IN THE ELECTRIC CAR SPACE!

SUSTAINABLE TRANSPORTATION: YOUR ORGANIZATION, YOUR STAFF LEADING THE WAY

Plug'n Drive is a non-profit organization committed to accelerating the adoption of electric vehicles (EVs) to maximize their environmental and economic benefits. Over the past three years, Plug'n Drive has established itself as a leader in the EV space; a trusted source of unbiased information on electric cars, charging stations and the electricity sector.

Our programming focuses on three key messages:

Electric vehicles save drivers money

Electric vehicles help the environment

Electric vehicles benefit the local economy

We offer a variety of services that help your organization learn about electric cars and their benefits, avoid mistakes and save money as you navigate the ground-breaking developments in clean electric transportation.

Adèle Malo

President, Malo Energy Consulting

Carmine Marcello

President and CEO, Hydro One Networks Inc.

Gerry Smallegange

CEO, Burlington Hydro

Gaëtan Thomas

President and CEO, New Brunswick Power

Lawrence Zimmering

President and CEO, AutoCapital Canada Inc.

EMPLOYEE ENGAGEMENT PROGRAM

LUNCH AND LEARN FOR YOUR STAFF

This presentation at your site educates your staff about the plug-in hybrid and fully electric cars available in the Canadian marketplace from a variety of manufacturers.

Led by an experienced electric car driver and outreach professional, this seminar includes everything you need to know about the state of the electric car industry in Canada, including: the cost to drive an electric car, the carbon footprint and greenhouse gas reduction of driving an electric car, residential and commercial charging stations as well as how electric cars can benefit Canada's economy.

As part of the lunch and learn seminar, Plug'n Drive can make electric cars available for you and your staff to test drive to members of your staff for their personal use.

Plug'n Drive brings to your site several different makes and models of electric cars for your employees to test drive. Knowledgeable Plug'n Drive staff members will be available to answer questions and discuss the unique attributes of these cars and other models currently available.

Cost varies depending on size and scope. Contact us at 647-717-6941 for more information.

CHARGING STATION/FLEET CONSULTATION

CONSULTATION FOR CHARGING STATION SITE INSPECTION AND INSTALLATION

This turnkey consultation includes a Plug'n Drive representative undertaking a comprehensive review of your site for the optimum placement of electric car charging stations.

This includes an analysis of the potential for single or multiple charging stations, whether they should be in public or private areas and whether a fee for service is appropriate. An examination is made of your electrical capacity and if any permits are required. Parking locations designated for electric cars are suggested along with appropriate signage.

A proposal is developed that maps installation locations and recommends appropriate charging stations and electrical contractors. Upon approval, Plug'n Drive oversees the installation of the charging stations.

Plug'n Drive can create a unique coupon code for your organization that caters to individual employees or is part of a larger company-wide project. This code would be redeemed at chargemycar.ca for exclusive discounts on selected charging stations.

ELECTRIC CAR SUITABILITY FLEET ASSESSMENT WITH FLEETCARMA

This service helps you make cost-effective decisions for integrating electric cars into your fleet. A FleetCarma data logger is temporarily installed in each fleet vehicle being assessed to analyze current duty cycles and make electric car recommendations on a vehicle by vehicle basis.

This data-driven process provides the foundation for sound business decisions related to fleet management and supports the process of building the business and environmental cases for electric cars.

Cost varies depending on size and scope. Contact us at 647-717-6941 for more information.
